

COMPLETE RESEARCH SOLUTIONS

Let's show you what our team of professionals can do
for your research.

About EJOLIFE

From small molecule compounds to large molecule products, such as antibodies, peptides, and proteins; from bioproducts to genetically engineered products; from catalog products to custom services, we EJOLIFE are specialized in providing complete solutions for your research. **Your success is our success.**

Catalog Products

Antibody

15,000+ monoclonal & polyclonal antibodies

ELISA Kit

5,000+ ELISA kits and antibody pairs

Protein & Peptide

25,000+ recombinant proteins and peptides for multiple uses

Bioactive Compounds

30,000+ bioactive compounds & 200+ compound screening libraries

Molecular Biology

A variety of enzymes and Kits

Laboratory Consumable

Laboratory consumables for daily use

Custom Services

Gene Editing & Cell Modeling

Recombinant Protein Service

ELISA Service

Antibody Service

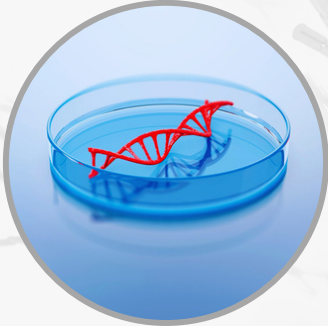

Peptide Service

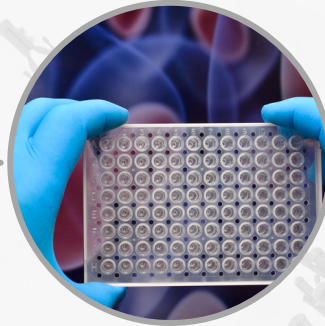

Other CRO Services

R&D Platforms

What is Coming Up?

Intestinal Organoid

We will provide catalog and custom intestinal organoids for drug discovery and patient-specific drug screening, cancer and immunology studies, and the pathogenesis of infectious agents.
